Summary
Former Attorney student turned into Software Engineer with 3+ years of experience building apps, using Kotlin, Java, and Modern Software Architecture.

Experience

◆ <u>**Raico SA -** May to Oct 2025 | Chile</u>
Achievments: I developed a simulated **mobile** application to obtain administrative information, which is part of a larger simulated industrial design project. All the project is combined with **.Net** technologies, like transact C# and VB.
Tech stack: Kotlin, C#, VB, PostgreSQL, TSQL, Docker, FireStore, JSON, Git.

◆ <u>**Personal Project -** Apr 2024 to May 2025 | Chile</u>
Achievments: Mobile web scraper. Retrieves info from congressman web pages.
Tech stack: Kotlin, Jsoup, JSON, WebScrapping, Git.

◆ <u>**BL Trading SpA -** Aug 2022 to Apr 2024 | Chile</u>
Achievments: Mobile mock app for integration with **Mercado Libre API**, enabling real-time tracking of stock movements from multiple sellers, and implemented backend services improving data availability and reducing API latency ensuring smooth synchronization with backend services.
Tech stack: Kotlin, Node, Java, PostgreSQL, Docker, DigitalOcean, Git.

◆ <u>**Dhemax -** *Apr to Aug 2023 | Chile*</u>
Achievments: Contributed to a mobile team of 6 (Android, iOS, QA, UX, Backend, PM) using **Scrum/Jira**. Implemented **real-time charge monitoring** with StateFlows & Coroutines to ensure instant data flow for electric vehicle owners. Integrated **Google Maps API** to display available charging points with connector details and status. Collaborated closely with **UI/UX designers** to refine user experience.
Tech stack: Kotlin, Java, StateFlow, Coroutines, Firestore, Google Maps API, Git.
